DETAILED ACTION

Response to Amendment

1. This in response to remarks dated on 02/04/2009.

The following is the current status of claims:

Claims 1-60, 62 and 70 have been canceled.

Claims 61, 63-69 and 71-90 remain pending for examination.

Response to Arguments

2. Applicant's arguments, filed on 08/21/2008, with respect to the 35 U.S.C. 103(a) rejections of the pending claims 61, 63-69 and 71-90 have been fully considered and are persuasive. The 35 U.S.C. 103(a) rejections of claims have been withdrawn.

However, the Examiner maintains the 35 U.S.C. 101 rejection. Because the amendments do not overcome the rejection.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 61, 63-69 and 71-90 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

As set forth in MPEP 2106:

As per independent claim 61

The independent claim 61 is directed to a platform comprises a "system". The claimed steps are not being performed by any form of computer hardware component. The claim is recited a series of steps without having a memory and processor to process the steps as claimed. The claimed, "system" fails to fall with one of four statutory categories of invention, process, machine, manufacture and composition, and is software per se.

Moreover, applicant specification, describes "platform" as a software., paragraphs [0065] and [0067].

The dependent claims are rejected under the same rational.

Claims would be allowable if applicant does overcome the 35 U.S.C. 101 rejection.
